

# How to upload templates and Indykatory for folders in the exchange?

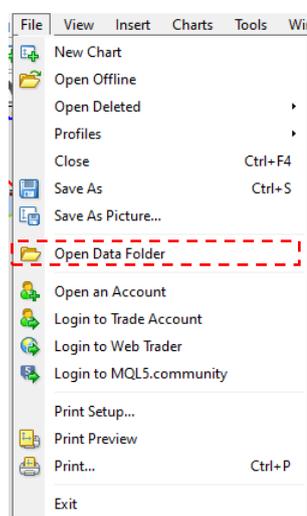

1. List of Indicators.

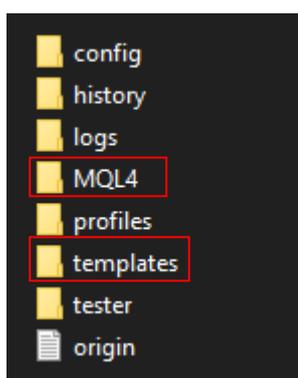

Copy selected template.

2. Open the exchange.

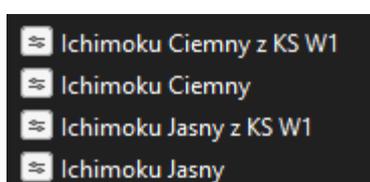

3. In the menu bar at the top select a file, then "Open Data Folder"

4. Folders will be shown. We are interested in two: "MQL4" and "templates".

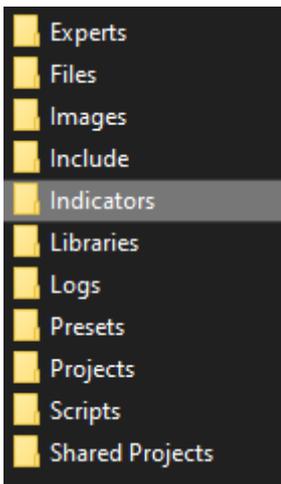

5. Open the "templates" folder and paste the template you are interested in from the four given.

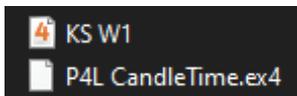

6. After uploading the template, go back and open the "MQL4" folder.

7. Go to the "Indicators" folder.

8. We then paste in the indicator we are interested in.

9. DONE! Close the Folder and Restart the Exchange.

## How to open templates and Indykators on the stock exchange?

1. Open the exchange.

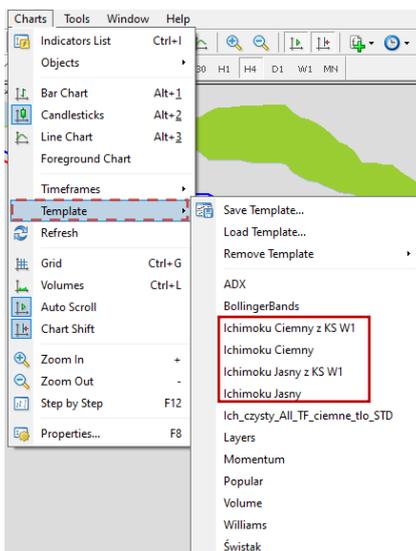

2. Exchange menu bar:

3. Select from the menu bar.

**Charts** or **Insert** as required.

4. Then select the "Template" tab and choose the template you uploaded.

5. To upload an indicator of your choice. In the menu bar choose insert .

Select the "Indicator" → "Custom" and choose the indicator you are interested in

7. In the case of templates from "KS W1" you do not need to upload the indicator again from KS W1.
